

Results for MSc Thesis

Hamish Jelleyman

June 2020

1 Introduction

This document will consist of every result produced for my thesis, categorised and labelled correctly.

Contents

1	Introduction	1
2	Local t2m and SIC correlations	3
3	Global correlations	4
4	Anomalous global correlations	6

List of Figures

1	Correlation between temperature at 2m with sea ice concentration.	3
2	Correlation between 2m temperature globally and total Sea Ice Extent in Antarctica.	4
3	Correlation between surface pressure globally and total Sea Ice Extent in Antarctica.	4
4	Correlation between 10m wind speed globally and total Sea Ice Extent in Antarctica.	5
5	Correlation between u component 10m wind speed globally and total Sea Ice Extent in Antarctica.	5
6	Correlation between v component 10m wind speed globally and total Sea Ice Extent in Antarctica.	6
7	Correlation between anomalous 2m temperature globally and total Sea Ice Extent in Antarctica.	6
8	Correlation between anomalous surface pressure globally and total Sea Ice Extent in Antarctica.	7
9	Correlation between anomalous 10m wind speed globally and total Sea Ice Extent in Antarctica.	7
10	Correlation between anomalous u component 10m wind speed globally and total Sea Ice Extent in Antarctica.	8
11	Correlation between anomalous v component 10m wind speed globally and total Sea Ice Extent in Antarctica.	8
